

FBR completes Factory Acceptance Testing for Newest Hadrian®

Monday, 13 October 2025 – Robotic technology company **FBR Limited (ASX:FBR; OTCID:FBRKF)** ('FBR' or 'Company') is pleased to announce that its newest Hadrian® unit has completed Factory Acceptance Testing at FBR's premises in High Wycombe, Western Australia.

During the Factory Acceptance Test, the Hadrian® built a test structure comprised of 751 blocks at an effective lay rate exceeding 285 blocks per hour.

FBR's CEO, Mark Pivac commented:

"We are pleased to have successfully brought another Hadrian® unit online, giving us the ability to deliver on our sales pipeline. This Hadrian® unit has an upgraded shuttle system for greater reliability, and an enhanced layhead for improved lay accuracy. We look forward to seeing the newest Hadrian® undertaking commercial work."

This announcement has been authorised for release to the ASX by the FBR Board of Directors.

About FBR Limited

FBR Limited (ASX: FBR; OTCID: FBRKF) designs, develops and builds dynamically stabilised robots to address global needs in a safer, more efficient and more sustainable way. These robots are designed to work outdoors using the company's core Dynamic Stabilisation Technology® (DST®).

Applications of DST® include the Hadrian® and Mantis™. Hadrian® is a bricklaying robot that builds structural walls faster, safer, more accurately and with less wastage than traditional manual methods. The Hadrian® provides Wall as a Service®, FBR's unique commercial offering, to builders on demand. Hadrian® robots are also available for purchase by order. Mantis™ is a high deposition welding robot for the large-scale metal fabrication industries such as mining, shipbuilding and defence manufacture.
